Wiki, projekt manažment a bug tracking systém

Peter Rybár

Prehľad

- **trac – bazaar-type** project environment
- Integruje:
 - **Wiki** server (podobný **MoinMoin**)
 - **Issue Tracker** (niečo ako **Bugzilla**)
 - integrovaný so **Subversion SCM**

Project GPSMON (CENTAUR s.r.o.)

 Searchlogged in as prybar | [Logout](#) | [Settings](#) | [Help/Guide](#) | [About Trac](#)

[Overview](#) | [Configuration](#) | [Plugins](#)

About Trac 0.10.3

Trac is a web-based software project management and bug/issue tracking system emphasizing ease of use and low ceremony. It provides an integrated Wiki, an interface to version control systems, and a number convenient ways to stay on top of events and changes within a project.

Trac is distributed under the modified BSD License. The complete text of the license can be found [online](#) as well as in the COPYING file included in the distribution.

Please visit the Trac open source project at <http://trac.edgewall.org/>.

Copyright © 2003–2006 [Edgewall Software](#)

Powered by **Trac 0.10.3**
By [Edgewall Software](#).

Visit the Trac open source project at
<http://trac.edgewall.org/>

Integruje

- **Wiki** – typ Web stránky, ktorý umožňuje užívateľom jednoducho pridávať, mazať alebo inak meniť jej obsah. “Web 2.0” technológia.
- **Issue Tracker** – spôsob manažovania bugov a iných problémov/otázok súvisiacich s projektom.
- **Subversion** – Source Code Management (SCM) program používaný pri vývoji softvéru.

Wiki

- Trac má **vstavaný Wiki engine**
- Má **štandardné Wiki formátovacie príkazy**
- Implementuje **rozšírený subset príkazov** z populárnych Wiki, zvlášť **MoinMoin**
- Má **špeciálne „TracLinks“** ktoré umožňujú referencovať **tickety, reporty, changesety, revision logy, diffy, milestony, súbory, ...**

Projekt SPP GPS Monitoring

Výsledky analýzy a projektové podklady nájdete v svn:

svn://svn.centauro.sk/gpsmon/trunk/analýza_podklady

Guideline pre prácu s SVN:

1. checkout z repository do pracovného adresára. ...
2. import do DB z pracovného adresára
3. vývoj v DB (medzi krokom 2. a krokom 3. bez UPDATE!, pokiaľ tu updatnete, je možné že odpalíte niekoho zmeny)
4. export z DB do pracovného adresára
5. update (v tomto kroku sa spravi merge, ak je to potrebné)
 - o tento krok je možné vynechať, pretože ak je potrebné updateovať, necommitnete, takže da sa aj: 1.commit, 2.ak sa nepodari commit update a následný commit
 - o to či je potrebný update si môžete zistiť aj tak že sa pozriete na revízie v SVN. Ak existuje v SVN revízia ktorá je novšia ako, tá ktorú ste si update-ili tak bude treba update
 - o v tomto kroku môžu nastať konflikty, pokiaľ sa neda automaticky mergeovať.

v skratke: ak spravíte krok 5 vždy, nič nepokazíte..

6. otvoriť dialogové okno pre commit..
7. pred definitívnym commitom sa VZDY pozrieť v tom dialogovom okne na to, aké súbory ste modifikovali a dvojkliknúť na KAŽDY modifikovaný súbor a pozrieť VSETKY zmeny, ktoré ste spravili..
8. commit
9. import z pracovného adresára do DB (!!! Doležite najmä pokiaľ sa počas update-u nejake súbory update-ili alebo sa spravil merge, ak neimportnete môžete odpáliť zmeny v následujúcom committe)
10. overiť, či nenastala chyba pri importe, resp. či sa nerozkomplikovali nejaké balíky, a nedajú sa skompilovať, ak áno, treba to opraviť.v repository vždy musí byť fungujúca verzia.. -> krok 2

Informácie pre DB tím

Editing "TracGuide"

Adjust edit area height: 20

= The Trac User and Administration Guide =
[[TracGuideToc]]

The TracGuide is meant to serve as a starting point for all documentation regarding Trac usage and development. The guide is a free document, a collaborative effort, and a part of the [http://projects.edgewall.com/trac/ Trac Project] itself.

== Table of Contents ==

Currently available documentation:

- * TracGuide (This page) -- Documentation starting point.
- * TracInstall -- How to install and run Trac.
- * TracUpgrade -- How to upgrade existing installations.
- * TracAdmin -- Administrating a Trac project.
- * TracImport -- Importing tickets from other bug databases.
- * TracIni -- Trac configuration file reference.
- * TracPermissions -- Access control and permissions.
- * TracInterfaceCustomization -- Customizing the Trac interface.
- * TracPlugins -- Installing and managing Trac extensions.
- * TracWiki -- How to use the built-in Wiki.
- * TracBrowser -- Browsing source code with Trac.
- * TracChangeset -- Viewing changes to source code.
- * TracTickets -- Using the issue tracker.

Note: See [WikiFormatting](#) and [TracWiki](#) for help on editing wiki content.

Subversion

- **Subversion** je **defaultny SCM** pre Trac.
- **Commit messages** sú integrované s Tracom
 - Close an issue with a commit message
 - Reference an issue with a commit message
- Vo Wiki alebo Issue Trackeri môžeme použiť **referencie na revíziu v SVN**
- Trac má **vstavanú podporu pre prezeranie SVN repozitory**.

Issue Tracker

- Trac má **issue tracker**, ktorý **sa konceptom podobá projektu Bugzilla**
- Je centrálnym projekt manažment elementom
- Tickety sú používané na
 - **tasks**
 - **feature requests**
 - **bug reports**
 - **software support issues**
